Full-stack developer building web applications and internal tools with LLM coding agents and agentic workflows, and bringing AI into how the team works. Grounded in React, Node.js and MongoDB, and I own the work end to end: requirements, implementation, testing and maintenance. Fluent in English.

EXPERIENCE

2026 – now — **Full-stack developer** · ***Moveo Creative***

- Lead developer on full-stack projects for enterprise clients: custom WordPress (PHP, Gutenberg, ACF) and React / Next.js sites, from requirements through deployment and maintenance.
- Day-to-day contact with clients and third-party vendors: gathering requirements, coordinating integrations, resolving issues.
- Brought LLM coding agents and custom AI tooling into the team's workflow, including a hybrid-search RAG assistant over MCP.
- Built and teach an internal web development course, with a full module on building with AI, delivered live to the whole creative team.

2022 – 2026 — **Full-stack developer and coding instructor** · ***Mister Bit***

- Developed and maintained client web apps with React, Node.js / Express and MongoDB.
- Taught multiple full-stack course cycles of 60–70 students each at Coding Academy: JavaScript, React, Node.js, Express, MongoDB.
